The above came from an English translation of social welfare with a decision from people to give to ourselves more money from printing it ourselves with any paper or translating the digital bank accounts into a paper book account with self account management without being in touch with banks.

Now we need help to mondialize it worldwide as they did vaccinations for COVID.

Step 1: that everybody and creature get a book and put 4 columns as mentioned here:

A. Operation number like 1 if it's the first writing in the book. That's for column number 1.

B. Column 2 with the title - Date of operation(operation can be a money deposit or money withdrawal or payment out to a vendor of services or goods) like 30/10/2024

C. Column 3 - Money Deposit from daily worldwide money allocations or any money entry from business.

D. Column 4 - Payment to any supplier or seller of goods or services as well as withdrawals. A withdrawal can be a writing on paper with pen or any ink for any purpose.

E. Column F - Description about the line operation or transaction, more details about it example: payment for sandals

B. Each person or nature or enterprise should on a daily basis enter it's world given money allocation decided by us an amount of 990 000 000 euros read as nine hundred ninety million euros or convert it to other currencies. Or enter a summary of 990 000 000 X 365 days per year = 361 350 000 000 euros in a line
